

## **RD Training Workgroup iLinc**

**July 16, 2015**

**10:30am**

Attendees: Sandi Veitch, Sharon Grasso, Emily Elliot, Tasha Williams, Brianna Morales, Heather Liddell, Nicole Brigham, Devon Wilson-Torres, Renee Cooper, Tamara Nisly

High Risk Guidebooks Update from Heather Liddell:

- Have begun work on Women's Guidebook
- Waiting for state Breastfeeding Team to advise on BF category curriculum for addressing women's BF concerns
- Discussed Code 101 preview sample provided (word document)

Ben discussed the group's preferences for Infant Guidebook organization:

- Survey feedback received
- Follow up questions
- Link Table of content to bread away to individual portions
- Case studies are separate so they can be printed individually
- Add formula training to the Infant Guidebook

Format requests:

- Larger font
- Organize guidebook with risk code with definition then case study.

Vote:

All agree that seeing the mock-up would be beneficial before making final decisions

RD/RDN observation tool:

- What abbreviation for High Risk or High Priority to use for consistency (HR or HP)
- Perhaps another term such as "if used" to make clear that GTHM tool use is not mandatory to be used at every appointment
- GTHM should have a disclosure that states e.g. "optional" or "if used."
- Add ADIME & PES not format, but trainers need training on how to properly use this format.

Training:

- Request training for ADIME & PES
